Art Unit: 2861

NON-FINAL REJECTION

Receipt is acknowledged of the "conditional" request for a Continued Prosecution Application (CPA) filed on 7/06/2006 under 37 CFR 1.53(d) based on prior Application No. 10/760,274. Any "conditional" request for a CPA submitted as a separate paper is treated as an unconditional request for a CPA. Accordingly, the request for a CPA application is acceptable and a CPA has been established. An action on the CPA follows.

Claim Objection

The claim 1 is objected to because of the following informality: on line 2, --locate-- should be added after "to". Correction is required.

CLAIM REJECTIONS

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 remain rejected under 35 USC 102 (b) as being anticipated Silverbrook (US Pat. 6,347,864).

Silverbrook discloses in Figures 1-10 a print engine comprising:

Application/Control Number: 10/760,274 Page 3

Art Unit: 2861

- a body (504) complementary to located a removable inkjet cartridge (548) having a pagewidth

printhead (516) and an air inlet port (746) (see Figures 2, 4-5 and 10, column 1, lines 10-25);

- an air compressor (522, 510) having an air outlet pipe (524) positioned to couple with and

exhaust air to the air inlet port (746) of the removable inkjet cartridge (548) at receipt of the

removable inkjet cartridge (548) by the body (504) (Figures 2-5 and 10);

-wherein the body (504) defines a recess dimensioned to locate the removable inkjet cartridge

(548) (Figure 2-3, column 2, lines 28 and column 4, lines 65);

- wherein the air outlet pipe (524) terminates within the recess of the body (504) (Figure 4);

- wherein the air outlet pipe (524) traverses a portion of the body (504) defining an internal shelf

of the recess (Figure 4); and

- wherein the air outlet pipe (524) has a termination configured to assist piercing of a seal (748)

over the air inlet port (746) (Figure 10).

Response to Applicant's Arguments

The applicant argues at the second paragraph of page 4 of the amendment that Silverbrook does not disclose a cradle having an air compressor which cooperates with an air inlet port of a removable inkjet cartridge to exhaust air to a printhead of the removable inkjet cartridge, as is required by amended claims 1-6. The argument is not persuasive because Figures

1-5 and 10 of Silverbrook shown limitations of amended claims 1-6 as discussed above.

CONCLUSION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Anh Vo whose telephone number is (571) 272-2262.

The examiner can normally be reached on Tuesday to Friday from 9:00 A.M. to 7:00 P.M..

The fax number of this Group 2861 is (571) 273-8300.
